

Note: The illustration shows the maximum possible range of equipment.

	Airbag		Stored gas inflator		Seat belt pretensioner		SRS control unit		Pedestrian protection active system
	Automatic rollover protection system		Gas strut / Preloaded spring		High strength zone		Zone requiring special attention		
	Battery low voltage		Ultra capacitor Low voltage		Fuel tank		Gas tank		Safety valve
	Battery pack, high-voltage		High voltage power cable		High voltage device that disconnects high voltage		Fuse box disabling high voltage		High voltage ultra-capacitor
	Low voltage device that disconnects high voltage		Fuse box disabling high voltage		High voltage component				

Brand	Type	Step	Year of market launch	Internal reference	Creation date	Edition	Version no.	Page
CUPRA	Born	1	2021	VSS-K110E50	10/08/2021	10/08/2021	1	1 of 4

1. Identification / recognition

The electric motor is noiseless. The display in the combi instrument (power meter) gives feedback as to whether the electric motor is switched off "OFF" or enabled for operation "READY".

Lettering

Charging connection

Motor compartment

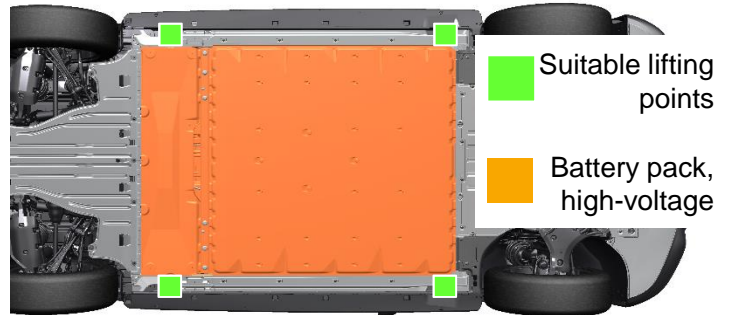

2. Immobilisation / stabilisation / lifting

Immobilising the vehicle

Actuate electrical parking brake.

Lifting points

3. Disable direct hazards / safety regulations

Switch off the ignition (power meter display "OFF")

A code card or a smartphone app may be used instead of a remote control key.

Deactivate high voltage system

Option 1: from the motor compartment

Disconnect the 12 volt battery

Disconnect the negative pole from the body contact point.

Brand	Type	Step	Year of market launch	Internal reference	Creation date	Edition	Version no.	Page
CUPRA	Born	1	2021	VSS-K110E50	10/08/2021	10/08/2021	1	2 of 4

Option 2: from the passenger compartment

Left hand drive:

Right hand drive:

Option 3: from the tailgate area

Do not touch, cut or open high-voltage components and high-voltage batteries!
Wear appropriate protective equipment!

In the event of accidents in which the airbag is deployed, the high-voltage system is automatically deactivated. The high-voltage system is voltage-free approx. 20 seconds after deactivation.

Disconnect from the charging station (emergency release)

4. Access to the occupants

Glass type:

- ① Laminated glass
- ② Single-pane safety glass

5. Stored energy / liquids / gases / solids

LI ION

400 V

Brand	Type	Step	Year of market launch	Internal reference	Creation date	Edition	Version no.	Page
CUPRA	Born	1	2021	VSS-K110E50	10/08/2021	10/08/2021	1	3 of 4

						12 V
---	---	---	---	---	---	------

 If coolant escapes from the battery cooling system, there is a risk of a thermal reaction in the high-voltage battery. Monitor the temperature of the high-voltage battery!

6. In case of fire

				
--	---	---	---	---

 Lithium-ion batteries can self-ignite or re-ignite after the fire has been extinguished. Wear appropriate protective equipment!

7. In case of submersion

After salvaging the vehicle from water, deactivate the high-voltage system (see Chapter 3) and allow the water to drain off. Wear appropriate protective equipment!

8. Towing / transportation / storage

<p>✓ </p> <p>✗ </p>	<ul style="list-style-type: none"> - Do not tow the salvaged vehicle using the drive axle. - Deactivate high-voltage system (see Chapter 3). - Park the vehicle at a safe distance from buildings and other vehicles (min. 5 m). [Quarantine area].
---	--

 Lithium-ion batteries can self-ignite or re-ignite after the fire has been extinguished. Wear appropriate protective equipment!

9. Important additional information

The vehicle does not have a towing eye at the rear of the vehicle.

10. Explanation of pictograms used

 Flammable	 Explosive	 Corrosive	 Hazardous to the human health	 Environmental hazard	 Electric Vehicle	 Warning, Electricity
 General warning sign	 Use water to extinguish the fire	LI ION Lithium-ion battery	 Dangerous voltage	 Remove smart key	 Use thermal infrared camera
